FORMOSAN TERMITES

To put LP SmartSide siding products to the ultimate test, LP regularly exposes samples to Formosan termites, widely recognized as one of the worlds most destructive pests. Each sample is placed on a plastic grid, surrounded by untreated bait samples, then laid directly on top of termite colonies. Even after 3 years, the LP SmartSide siding shows no structural damage, while the bait samples were completely destroyed within three months.

UNTREATED WOOD vs LP SMARTSIDE PRODUCT

Untreated wood devastated by Formosan termites (left) and undamaged LP SmartSide product protected with the SmartGuard® process (right) during same testing period.

LP SMARTSIDE
Siding Products

All LP SmartSide Panel Siding offers excellent moisture resistance because the wood throughout the entire panel is treated with an advanced formula of binders, resins, and wax. Plus, each panel is treated throughout with our proprietary SmartGuard® zinc borate-based process to resist fungal decay and termite damage.

BUILDING DIMENSIONS

16' buildings measures 15' 3" from trim to trim at the bottom and at the eaves it will measure up to 16'.

14' buildings measures 14' 3" from trim to trim at the bottom and at the eaves it will measure up to 15'.

12' buildings measures 11' 7" from trim to trim at the bottom and at the eaves it will measure up to 12'.

10' buildings measures 10' 3" from trim to trim at the bottom and at the eaves it will measure up to 11'.

8' buildings measures 8' 3" from trim to trim at the bottom and at the eaves it will measure up to 9'.

*THE BUILDING LENGTH IS 2" MORE THAN THE SIZES IN THE BROCHURE.

WHAT TO EXPECT AT DELIVERY

DELIVERY REQUIREMENTS

- Height up to 16' clear of obstructions.
- Width 2'-4' wider then the building on straight stretch and wider on sharp turns.
- Site checks are required for buildings 14' or wider.

PAD & BLOCKING REQUIREMENTS

- We recommend a level gravel or 4" concrete pad.
- If the building is not set on a concrete pad some settling may occur.
- **We are not responsible for resetting buildings.**
- Tie downs are recommended. The Backyard does not install tie downs.
- We Do Not Carry Concrete Blocks on our trucks
- If concrete blocks are needed customer is responsible to have the blocks on site at the building location.
- Blocking is needed every 8' per runner. When there is a porch add 4 more blocks per level.
- We supply the 4" wood blocks and smaller blocking to level the building.
- We place blocks free of charge for 1 level single stack.
- We charge \$3 per block to place additional blocks over 8" off the ground.
- We are not responsible for any tracks or ruts left on your property during delivery.

**FREE DELIVERY WITH IN 50 MILES OF OUR DEALERS
CALL FOR PRICING BEYOND 50 MILES.**

**Warning do not use open flame
gas heat. Use dry heat only.**
